Dear Anton,

Warmest congratulations to you on winning the 2022 Excellence in Online Course Design. I understand that you received this award along with your colleague Amanda Garcia, for your work designing the online course MATH 106, an intensive first-year course.

Ensuring our students receive an equivalent level of learning experience to face-to-face instruction is essential. Your efforts to develop interactive and captivating content have significantly enhanced their learning opportunities.

May you continue to achieve success in all your future endeavors.

Yours sincerely,

Vivek Goel, CM  
President and Vice-Chancellor
